Alternative Approach for Structured CPD Points

Worksheet

IBANZ and Professional IQ have considered the feedback from conference or workshop participants and have developed an alternative approach to questionnaires for Conference/workshop CPD points.

This will cover industry conferences or insurers roadshows/training, where a questionnaire handout is not available and where the topic is not product specific. To obtain structured CPD points you need to write a brief outline of the relevant learning outcomes for you from the conference or workshop you attended. Include how the outcomes fit with your learning plan and how it will enhance your professionalism.

This alternative approach meets the requirements of structured training.

Your conference/workshop must have applied to PIQ College for an IBANZ CPD rating before structured points can be awarded.
